

BARTELL DRUGS®

TREATING WASHINGTON WELL SINCE 1890

September, 2016

Dear Bartell Drugs Supplier:

Bartell Drugs is in the process of moving off our existing ERP platform to a new Microsoft Dynamics AX ERP platform later this year. This major change will provide us the ability to dramatically improve our speed and accuracy working with you on category reviews, new item entry and item file maintenance, inventory management, sales reporting and sell through analytics, accuracy for purchase orders (stage 2 expanded adoption of EDI), accuracy in marketing information and more. This will allow us to do much more with you, faster, using more automation and less labor.

Bartell Drugs will be utilizing the GDSN* as our product content system which will ensure total accuracy of our data. As a current supplier of ours, myself and the Bartell Drugs team are notifying you that **your company has been identified as a required participant for collaboration in our GDSN* initiative.**

If you are already registered in the GDSN and publishing your data to trading partners there should be little to no additional cost to you to publish your data to Bartell Drugs via the GDSN*. If you are not currently registered in a GDSN* data pool we suggest you contact our GDSN data pool Commport International. Either way, you can obtain all of the information you require by going to <http://www.commport.com/bartell-drugs/>. If you are in the GDSN please register on the Trading Partner Form and download the 3 "Key Documents". If you are not in the GDSN please download the GDSN Community Enablement Guide and GDSN_101 document. To contact Commport reach out to Brian Miles at 1-905-726-5297 or brianm@commport.com.

Prior to our new ERP launch we need to build a complete new product master and other data files needed to run our business. To accomplish this we **must receive** your GDSN* product data. Our expectation is to receive 100% of all required item information via the GDSN*. Going forward we expect to receive all new item information, item changes and deletion notifications via the GDSN*.

In summary, to properly launch our new ERP platform **we are counting on your support. Please be aware we need to receive all your data no later than October 16, 2016.** Thank you in advance for your continued commitment to grow your partnership with Bartell Drugs. We look forward to sharing the benefits of this important collaboration with you.

Brent Beebe

Senior Vice President of Merchandise

* GDSN (Global Data Synchronization Network) is a global network of data pools that uses GS1 global standards to publish supplier product data to their authorized trading partners. Many large retailers, wholesalers and distributors in America and around the globe use the GDSN today. Visit: <http://www.gs1.org/GDSN>
